

In order to remove or reduce risks and accidents, ISELFA MORSETTERIA s.r.l. Management decided to undertake the development and the maintenance of a Safety and Health Management System, according to the requirements of the UNI ISO 45001 standard, extended to all activities related to the:

DESIGN AND PRODUCTION OF FITTINGS, SPACERS, JOINTS AND VIBRATION DAMPERS FOR ULTRA-HIGH, HIGH AND MEDIUM VOLTAGE OVERHEAD TRANSMISSION LINES.

With the development of the Occupational Health and Safety Management System, the Management undertakes to pursue the following objectives:

- Prevent professional injuries and illnesses, also by rising awareness of third-party companies supplying services and / or works;
- Provide a system able to identify, pursue and update the objectives in terms of health and safety at work;
- Continuously improve the system and its results in terms of occupational health and safety;
- Promptly adopt the provisions of law on health and safety at work and the requests coming from the assessments that emerge from the safety management system.

To ensure the achievement of goals and objectives, the Management undertakes to:

- Involve, take responsibility and instruct all company functions on the principles, developed in their own safety management system, aimed at reducing accidents at work;
- Implement appropriate investments and actions in order to minimize risks and accidents at work within all company activities;
- Plan periodic reviews of the Health and Safety Management System to ensure constant efficiency and improvement;
- Maintain appropriate information channels to ensure a timely update on the introduction or evolution of new laws and regulations related to Health and Safety at work.

This document is made public by displaying at the production site, by publication on the company website <http://www.iselfa-morsetteria.it/> and by transmission to its third-party suppliers of services and / or works
